Value Addition

Anodizing

Anodizing is the electrochemical process provides additional protection aside from the natural oxide film. A durable, porous anodic oxide layer is formed on the surface of the aluminum. Anodized aluminum will also accept vibrant colors. We can anodize any kind of aluminum product. This Coating is desirable due to following properties:

- Increased corrosion resistance
- Increased durability / wear resistance
- Ability to be colored through dyeing
- Electrical insulation
- Excellent base or primer for secondary coating

We are the best to provide the best quality product

Glossy / melt finish

Up to 25 Microns thickness

Up to 6 meter length

Colour:

Satin, Silver, Champion, Golden, Bronze, Black

Packing

Vinitech Metal has always believed that customers should be given prime importance and all products should meet their requirements. This ideology is also practiced in the packaging process of the finished product. All products are packaged as per customer's requirements and only then dispatched.

So keep sections and their surfaces safe during transportation, we can provide interleaving with paper, polythene, stretch film, bubble sheet and cardboard as required. Wooden box and pallets can also be used when transport distances and sections sensitivity demand. Bundles are also made to facilitate manual loading/unloading.
